

## Terms Supplements

**For the Terms Supplement, we're including many terms/ideas that are important, but we're not sure if these should be CORE terms**

Action and Planning as Divergence Minimization

Action at a distance

Action Integral

Alignment (of internal states)

Bayesian

Bayesian Brain

Cognitive Science

Cognitivism

collective behavior

Connectionism

Control theory

Density

Deontic Action

Development

Dissipation

Dynamicism

Ecology

Ecology, Evolution, Development

Embedded Embodied Encultured Enactive Inference

Enactivism

Evolution

Expected Utility Theory

Explanation

Extended Cognition

Falsification

far-from-equilibrium

Fokker-Planck Equation

foraging

Generalized Synchrony

generative modelling

Gestalt

Gradient Descent

Group Renormalization Theory

guidance signal

Hamilton's Principle of Least Action

Hierarchically Mechanistic Mind

Hyperprior

Hypothesis

likelihood

Marrs Levels of Description

Material science

Niche construction

noisy signal

prediction error

prediction error minimization

Predictive Coding

Predictive Processing

Representationalism

Reservoir Computing

Reward

Self-organization

sensory input

sensory outcome

Signal

simulation

Terms Supplements	
For the Terms Supplement, we're including many terms/ideas that are important, but we're not sure if these should be CORE terms	
Sophisticated Inference	
stigmergy	
Synergetics	
Teams	
Theory	
Thermostatistics	
Thinking Through Other Minds	
Umwelt	
Variational Niche Construction	
Weak mixing	
World States (World Systems)
